

Software Engineering Project Proposal

Project Title: Smart Student Marketplace & Service Platform

Team Members:

Full Name	Student ID	Email
Mustafa Ismaili	131968	mi31968@seeu.edu.mk
Amra Demiri	131969	ad31969@seeu.edu.mk

Problem Description: University students often struggle to find trusted services such as tutoring, selling notes, or renting items. Current solutions like social media are unstructured and unreliable, lacking proper filtering and trust mechanisms.

Motivation: This project addresses a real-life student problem. It allows us to apply software engineering concepts like authentication, database design, and full-stack development.

Project Objectives: Develop a platform with user authentication, service posting, search functionality, messaging, and a review system.

Workload Distribution:

Team Member	Tasks	Hours
Mustafa Ismaili	Backend, API, Database, Testing	35
Amra Demiri	Frontend, UI/UX, Integration, Docs	35
